- The Missing Parts
 - 0-1 vs. 1-100
 - Customer Factory
- Goal Setting
- Your Business Plan

Why this series of lectures?

It's about \$ and your life plan

What's Your Dream Job?

Engineer/Scientist

Lawyer

Doctor

Professor
Googler

Manager

Financialist

Accountant

Why?

Ok, Let's Talk about **\$**

- Capitalism vs. socialism?
 - Free competition
 - Private property
- Capitalists vs. labors?

Salary = labor value - surplus value

Salary is (Relatively) Fixed

- Creates sense of security
 - Study/work hard
 - Save \$
 - Buy a house
 - Get married and raise kids
 - Work harder...
- Where does the surplus value go?

Capitalists

- Lay off labors when time is bad
- But never raise salary when time is good

“In 2010-2020, a newborn in top 1/6 inherits more wealth than one in bottom 1/2 can earn in her life.”

- Capital in the 21 Century by Thomas Piketty

- Justice?

Government

- Tax!
- Income tax: up to 45% in Taiwan
 - *Wrong target!*
- Capital levy:
 - Land value tax: up to 5.5% (<1% in reality)
 - Death duties: 10%-20%
- The law is (indirectly) made by the capitalists
- Education?

把地主拉下來不代表你能富起來。
--馬雲

Ways of Joining...

- Be of professions serving the capitalists
 - Lawyers, accountants, doctors, managers, etc. (not you)
- Be government officials that accept bribes
 - You have to be born in the right family
- Marry a capitalist's daughter or son
 - You have to look good
- To earn your own **\$** without huge capital
 - Investors (your landlord, not you)
 - To earn commissions (not you)
 - ***Be an entrepreneur***
- Or just be a happy labor
 - Have nice job at Google, Facebook, IBM, Microsoft, etc.
 - But don't complain when you get laid off at 40s!

Why Entrepreneur?

- You don't need
 - A rich daddy
 - A pretty face
- The web/app/SaaS markets are *flat* today
 - You have “super power” as a software developer
- Challenge:
 - You have to be the winner to take all

Outline

- Why?
- AARRR Funnel and Lean Startup
- The Missing Parts
 - 0-1 vs. 1-100
 - Customer Factory
- Goal Setting
- Your Business Plan

Disclaimer

- Not for general startups
- Focus on the ***web & app industry***
 - Lakes long-term justification
 - Subject to change
 - Worse, I am biased
- Aim: to be value-added by the practitioners

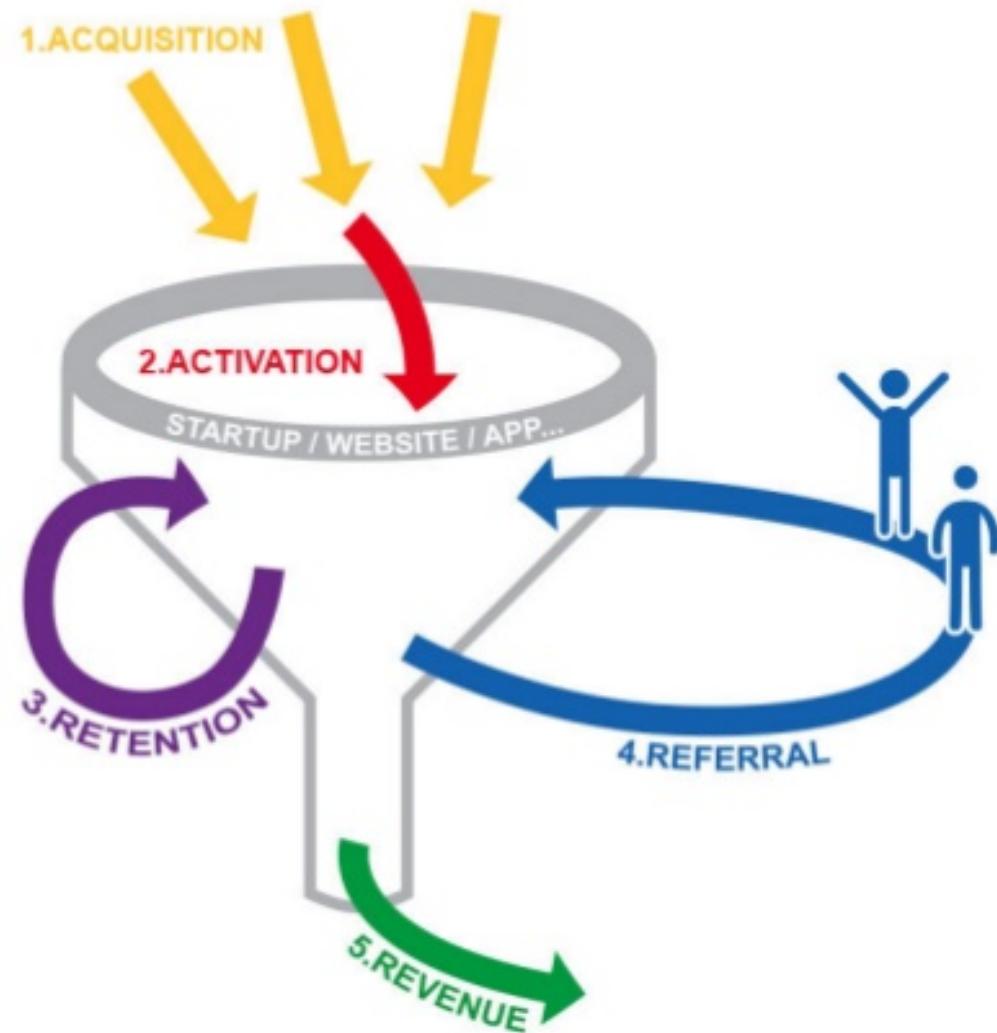

What is a startup?

“A startup is an organization formed to search for a *repeatable* and *scalable business model*.”

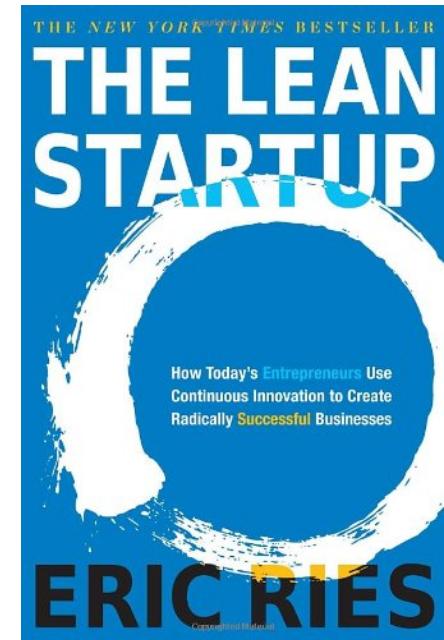

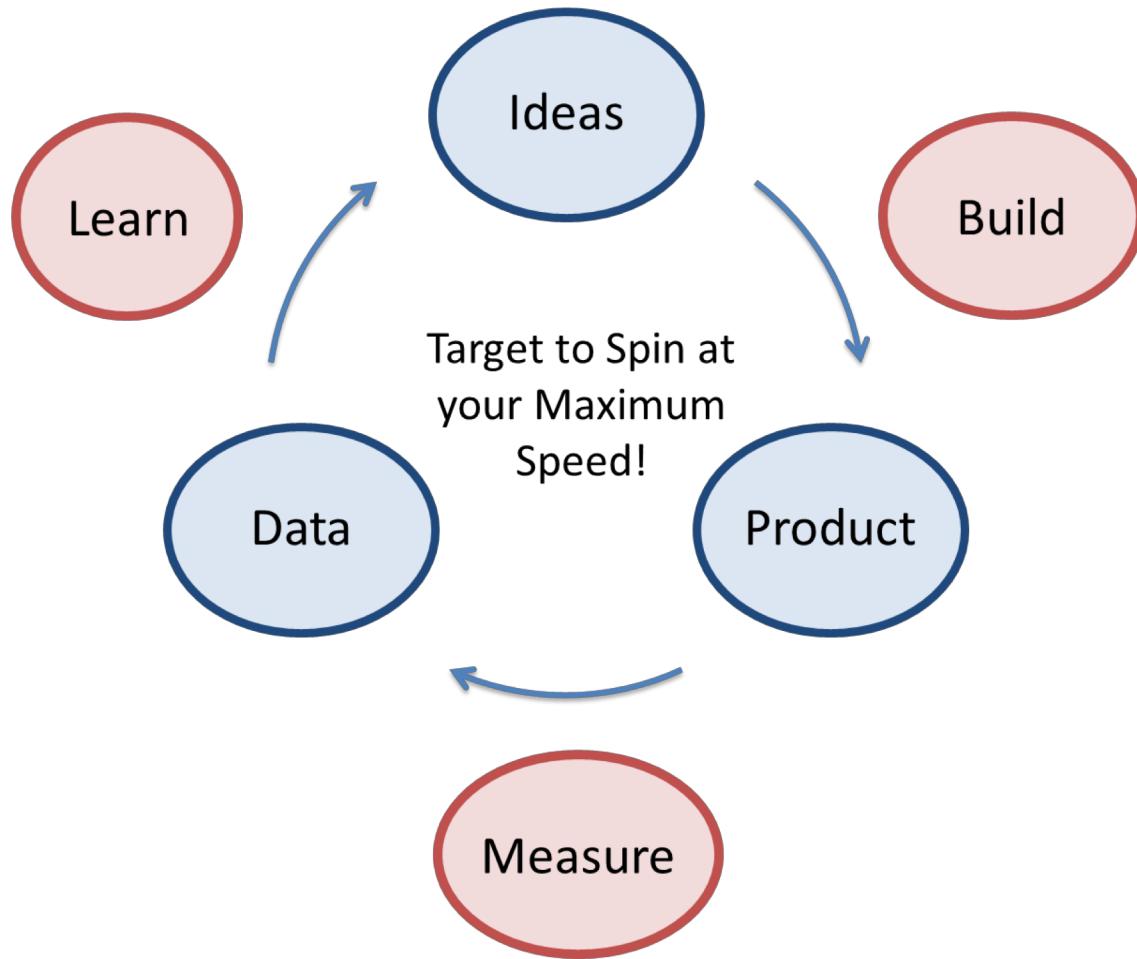

You make \$, or get out!

Product Launched! And Then?

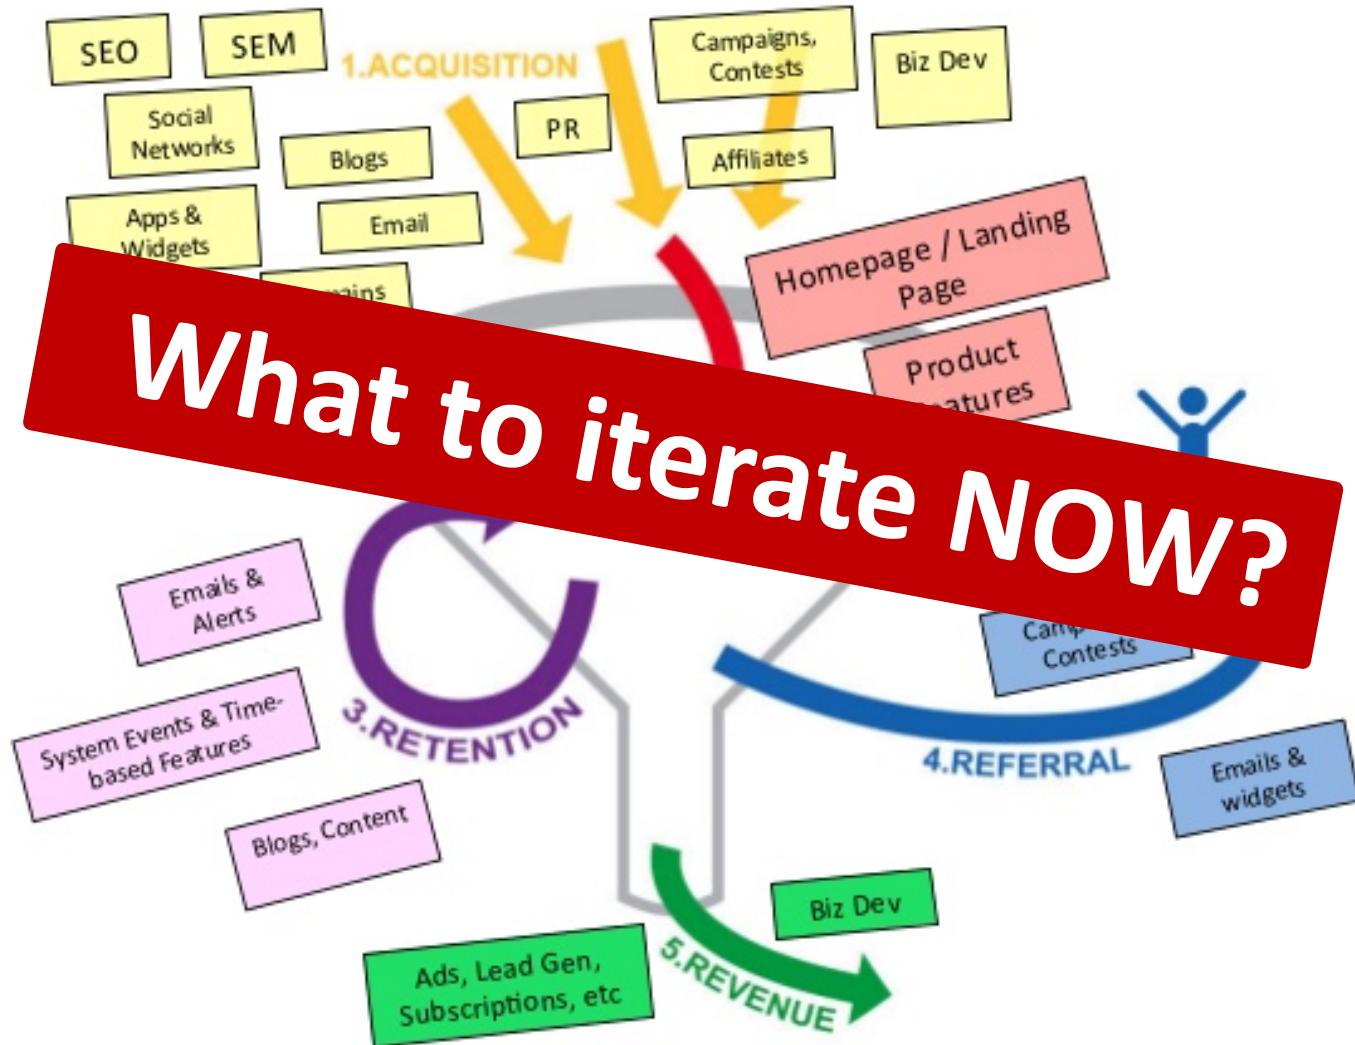

- **A**cquisition
- **A**ctivation
- **R**etention
- **R**eferral
- **R**evenue

Silicon Valley's Style: Lean Execution

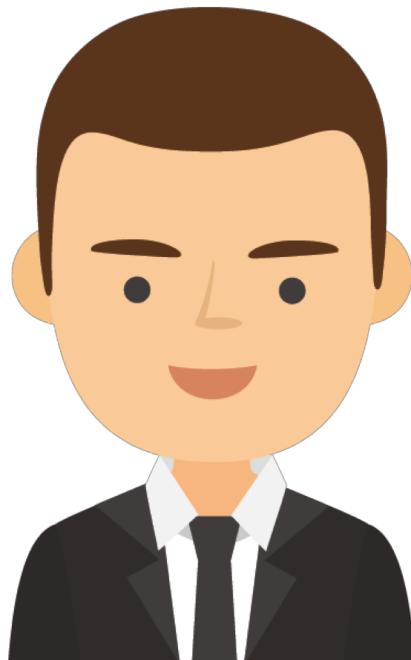

Problem: Too many TODOs

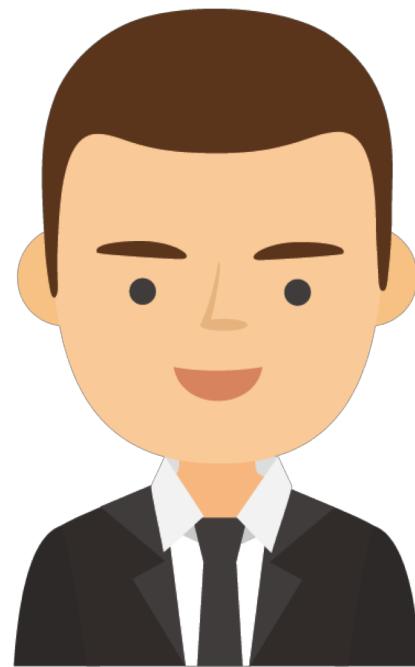

Solution 1

- I should hire a guy with MBA degree
 - after my product is ready

Solution 2

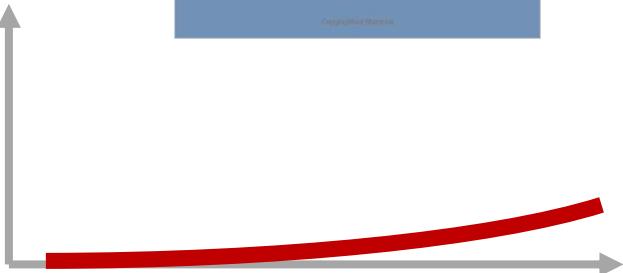

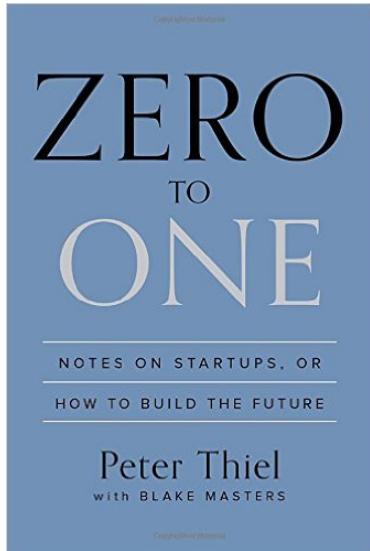

- Let's be a team!
 - You do iterations for Acquisition & Revenue
 - I take care of iterations for the rests

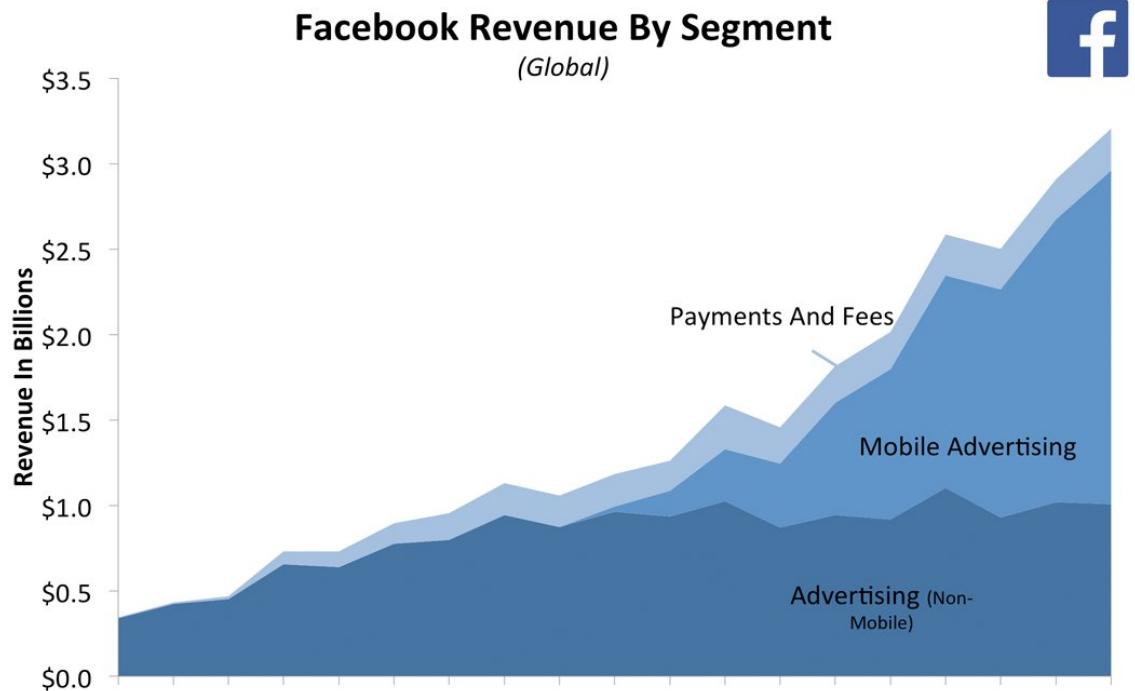

Outline

- Why?
- AARRR Funnel and Lean Startup
- **The Missing Parts**
 - 0-1 vs. 1-100
 - Customer Factory
- Goal Setting
- Your Business Plan

0 to 1 ≠ 1 to 100

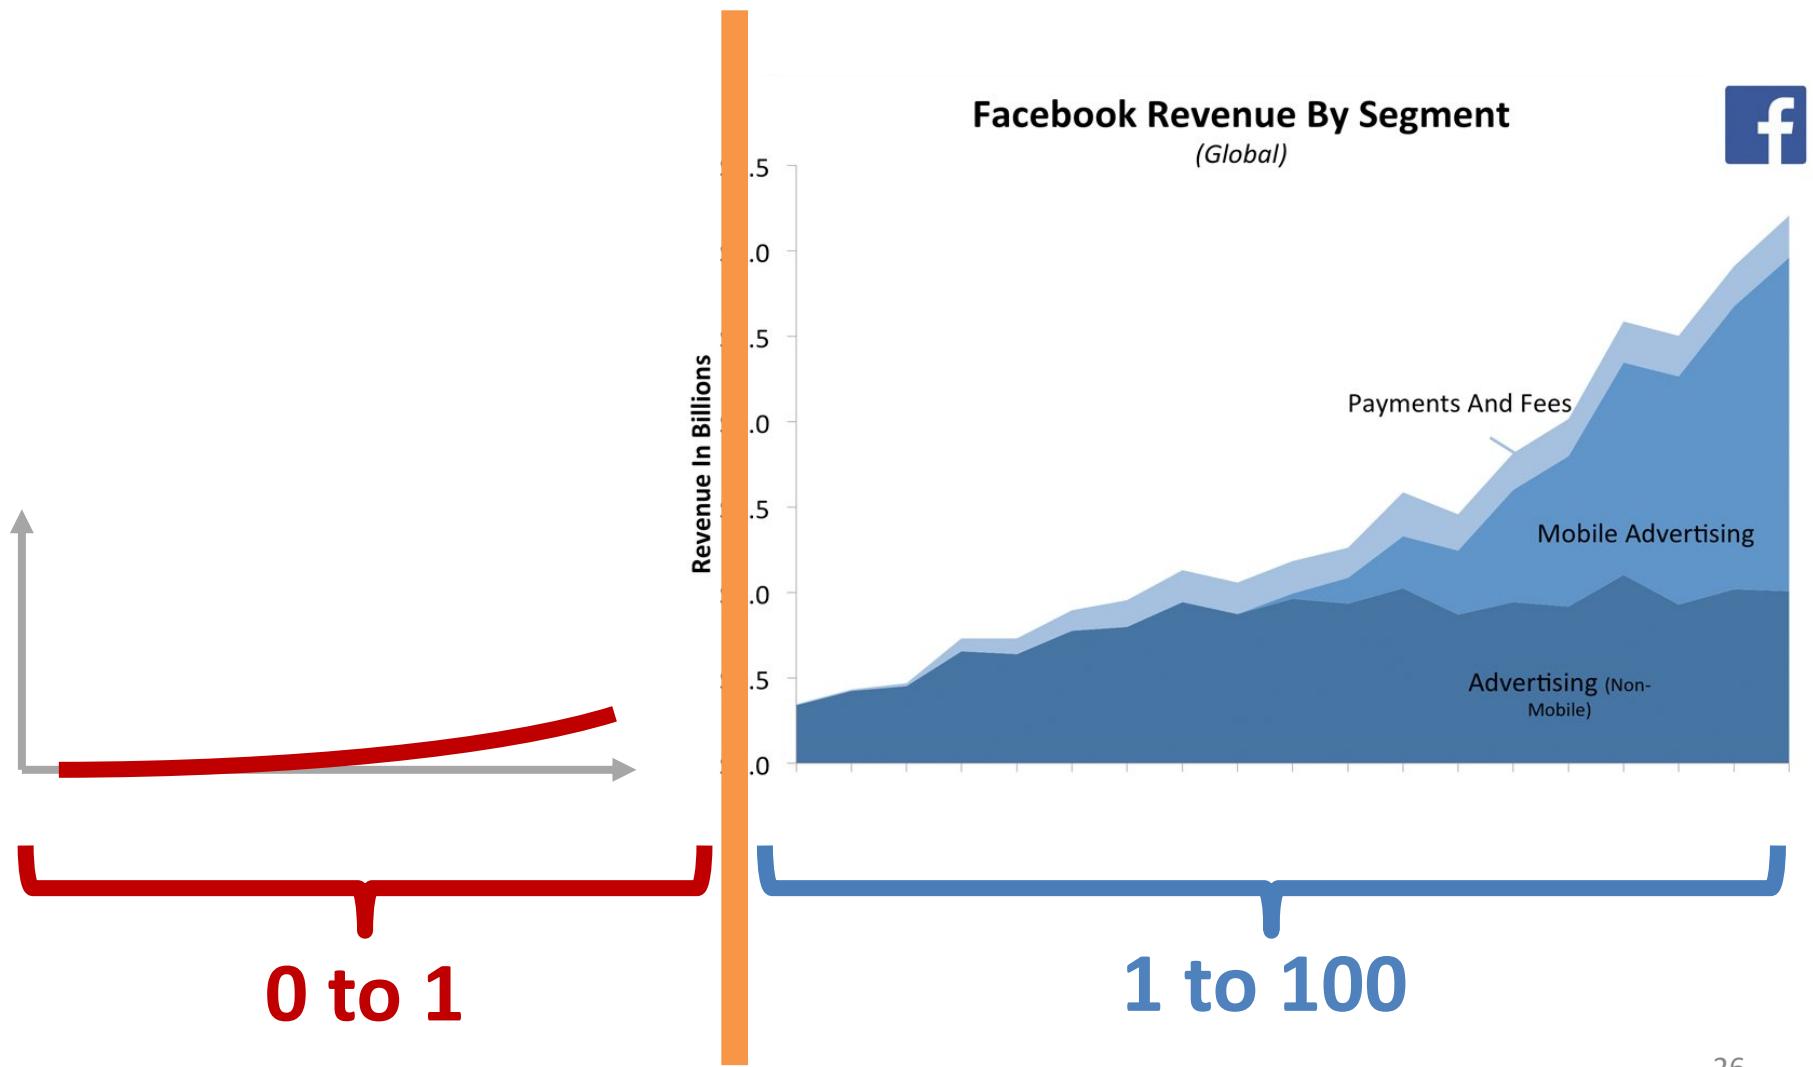

0 to 1

1 to 100

“You’ve found a repeatable and scalable business mode in **1** customer segment.”

Don't Hire MBAs (Now)

- Trained for 1-to-100 stage
 - Case studies
 - Theories

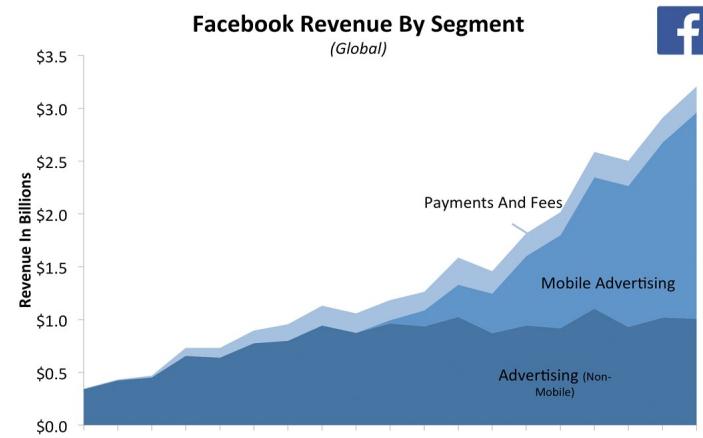

$$\text{ROI} = \frac{(R - C - OE)}{G}$$

Net Profit

 $R - C - OE$

Gross Profit

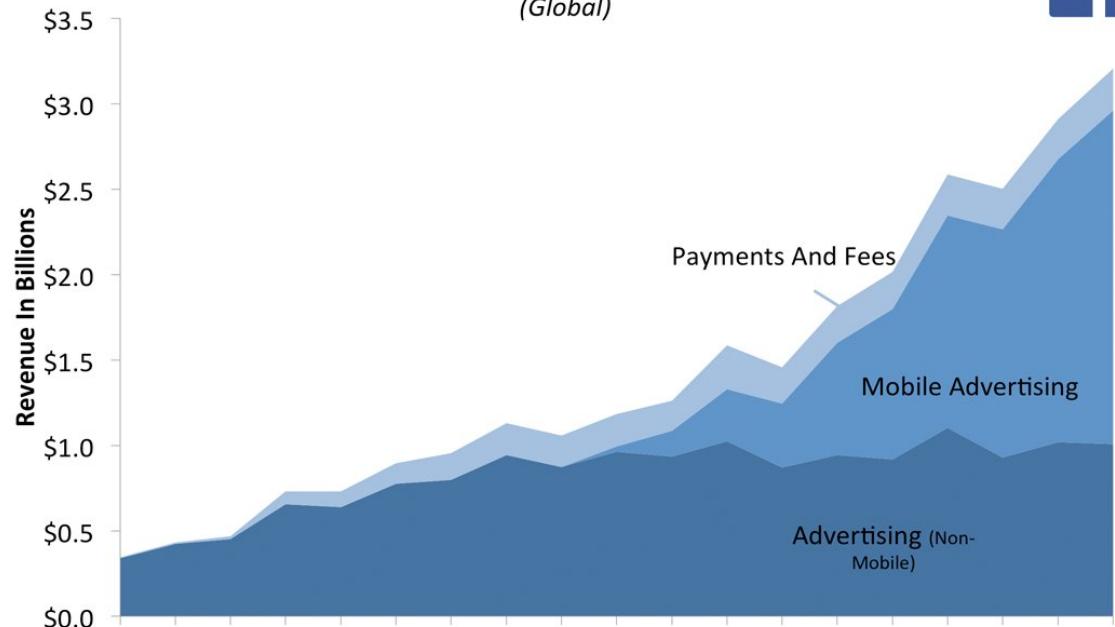

0 to 1

**Customers
(≠ users)**

1 to 100

**Facebook Revenue By Segment
(Global)**

Max #Customers

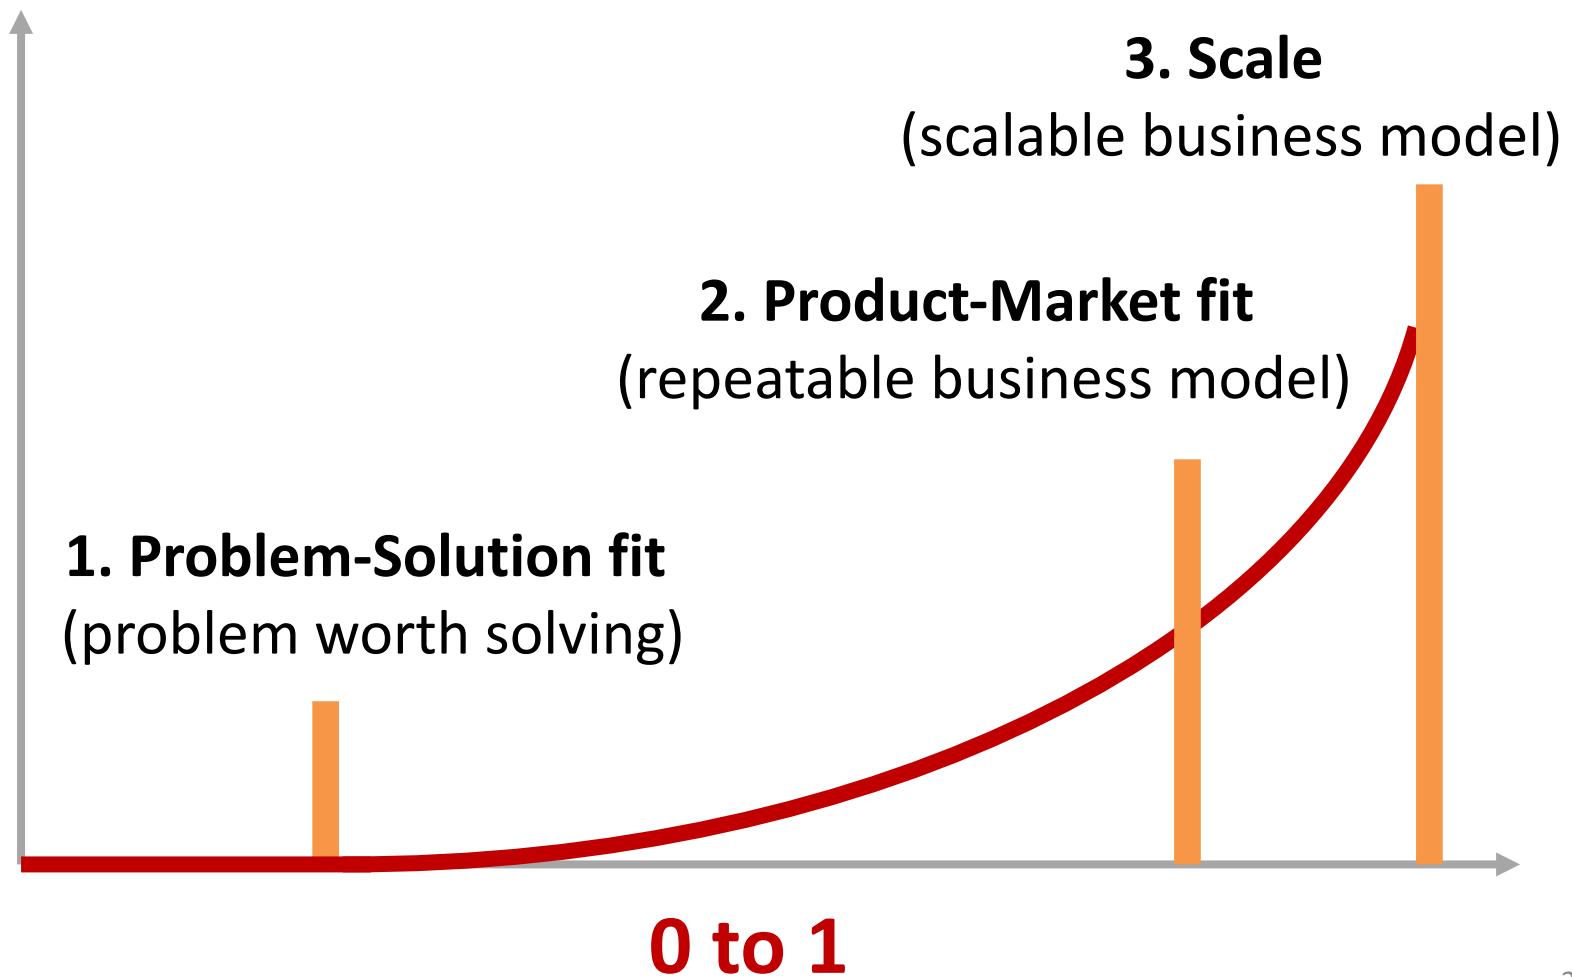

Max ROI

Non-Linearity & 3 Milestones

Customers

How to Reach PSF?

- You are solving a problem that people care
 - Hack: ***don't*** build a product just to validate it
1. Pitch potential users using a ***landing page***
 2. Observe what they ***did*** (not said)

Example

The image shows a dark, semi-transparent overlay of a website for "FriendlyAlarm". The website has a navigation bar with links for "About", "Why", "Features", and "Pricing". Below the navigation, there are three main sections: "1. Problem", "2. Solution", and "3. Call to action (CTA)". Each section contains a bullet point with an example. The "Problem" section has "– E.g., ‘Have you ever...?’". The "Solution" section has "– E.g., unique features + UI mockups". The "Call to action (CTA)" section has two examples: "– E.g., ‘Get Notified’ or ‘Share’" and "– Advanced: time on each section, exit point, expandable FAQ, etc.". The background of the overlay shows a blurred image of a group of people smiling.

FriendlyAlarm Why Features Pricing About

1. Problem

– E.g., “Have you ever...?”

2. Solution

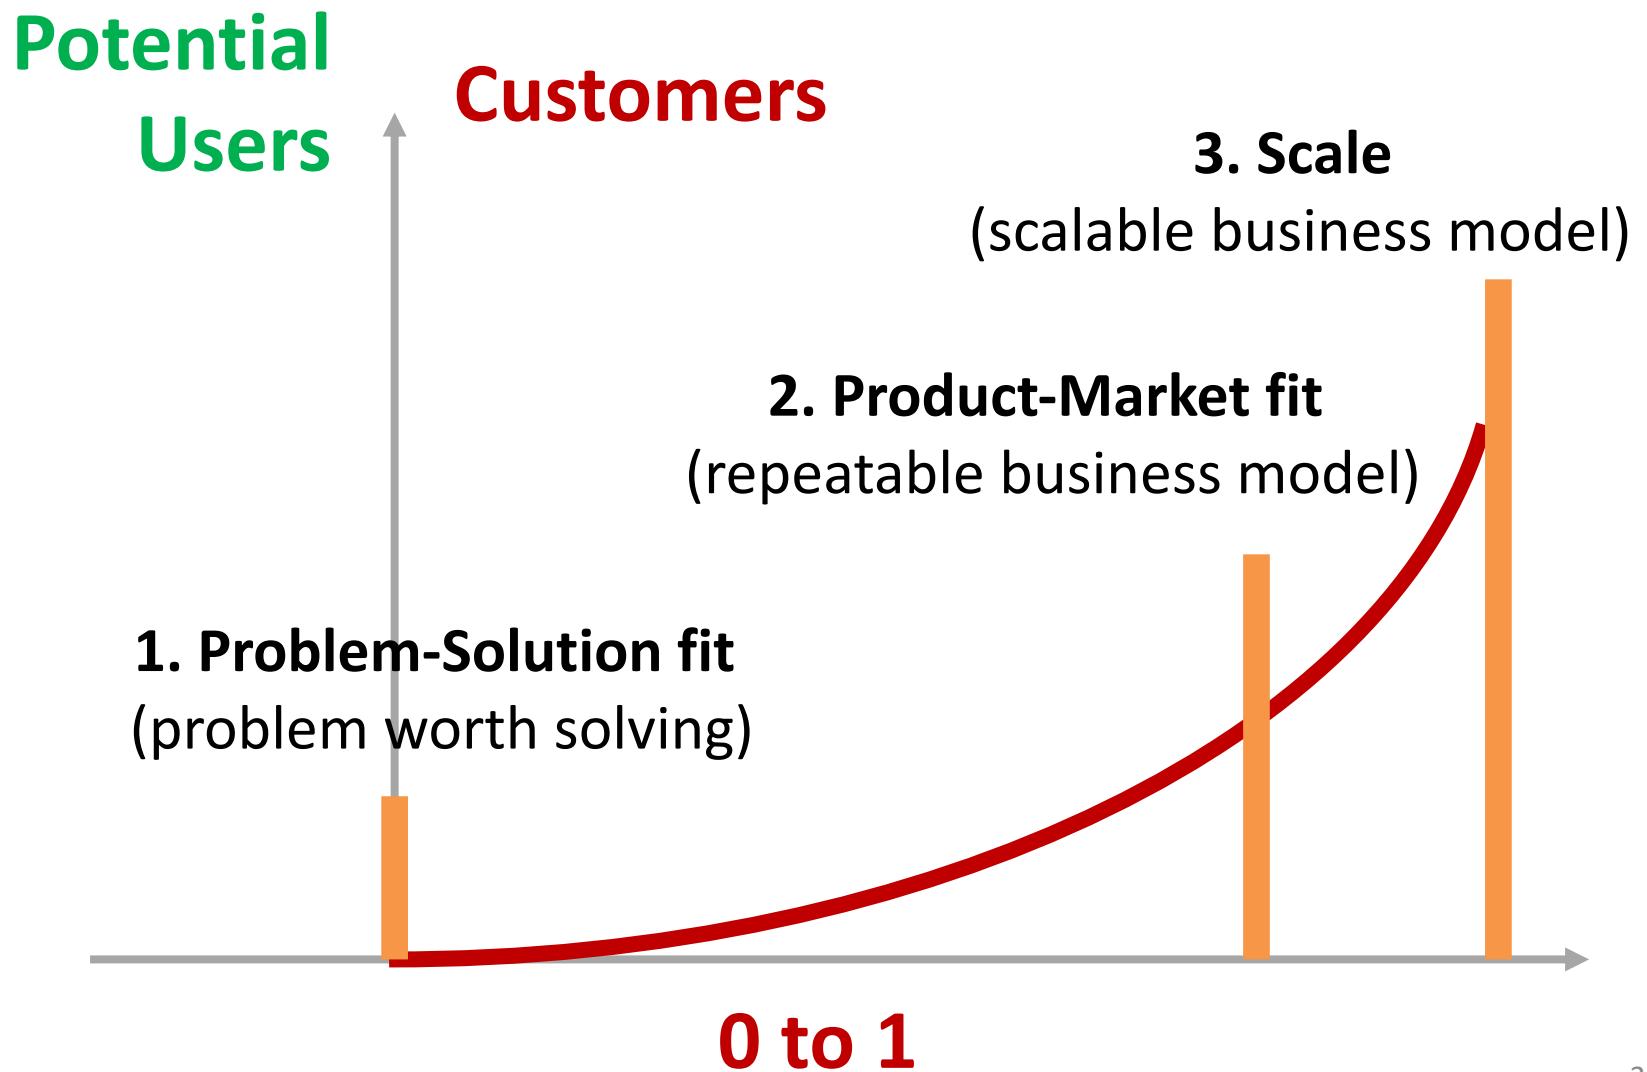

– E.g., unique features + UI mockups

3. Call to action (CTA)

– E.g., “Get Notified” or “Share”

– Advanced: time on each section, exit point, expandable FAQ, etc.

Goal: Get Potential Users

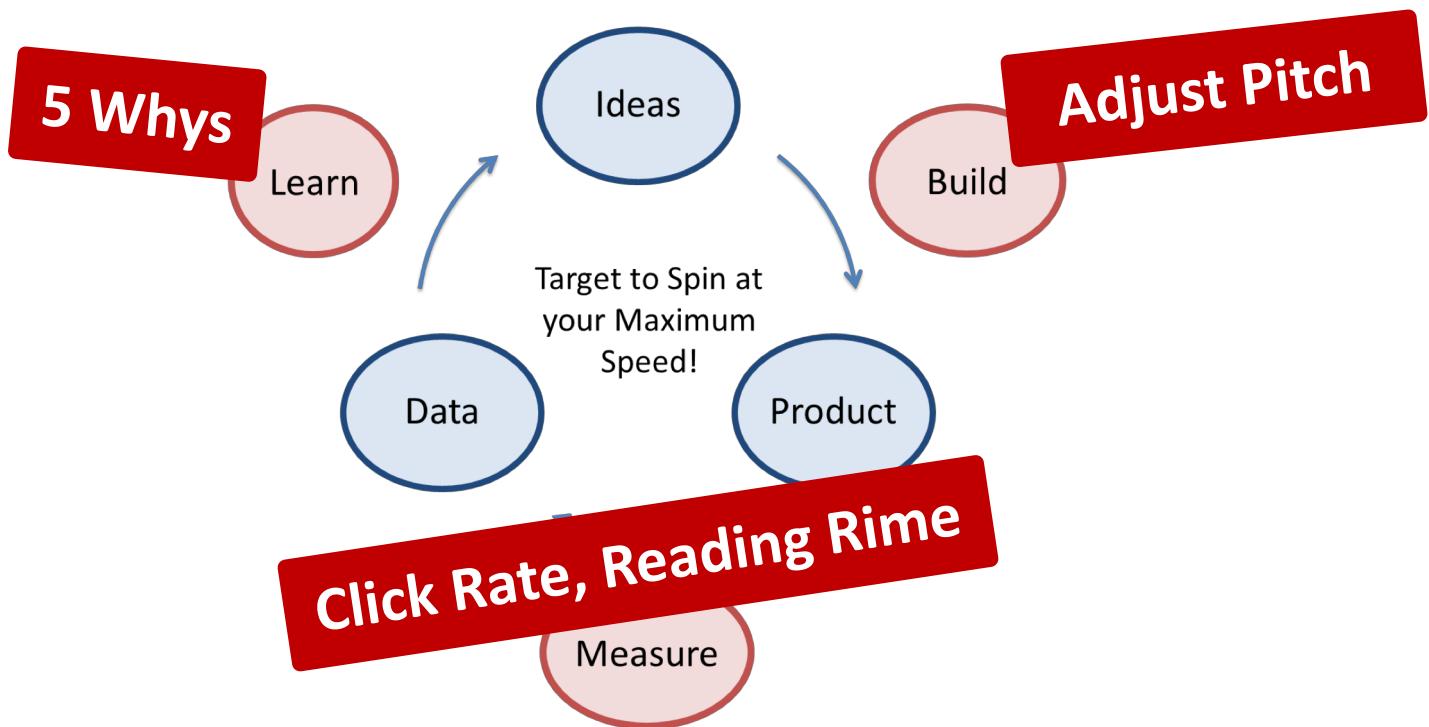

Your First Battle: Acquisition

- Let's accept it: acquisition costs!
 - Either time or **\$**
- Free channels first (take time)
 - FnF, Reddit/PTT, blogs/comments, Q&A, etc.
- Ask “strangers”
 - “My project” → “My friend’s project”

Iterate to Get PSF

- Goal: satisfactory #clicks in limited time
 - E.g., (100 in 2 weeks) or (50 in 1 week)
- Parallel iterations if you have multiple ideas

5 Whys

Why? No user clicks

- by Sakichi Toyoda

Why? Visitors leave at “How it works?”

Why? Leave at “Invite...”

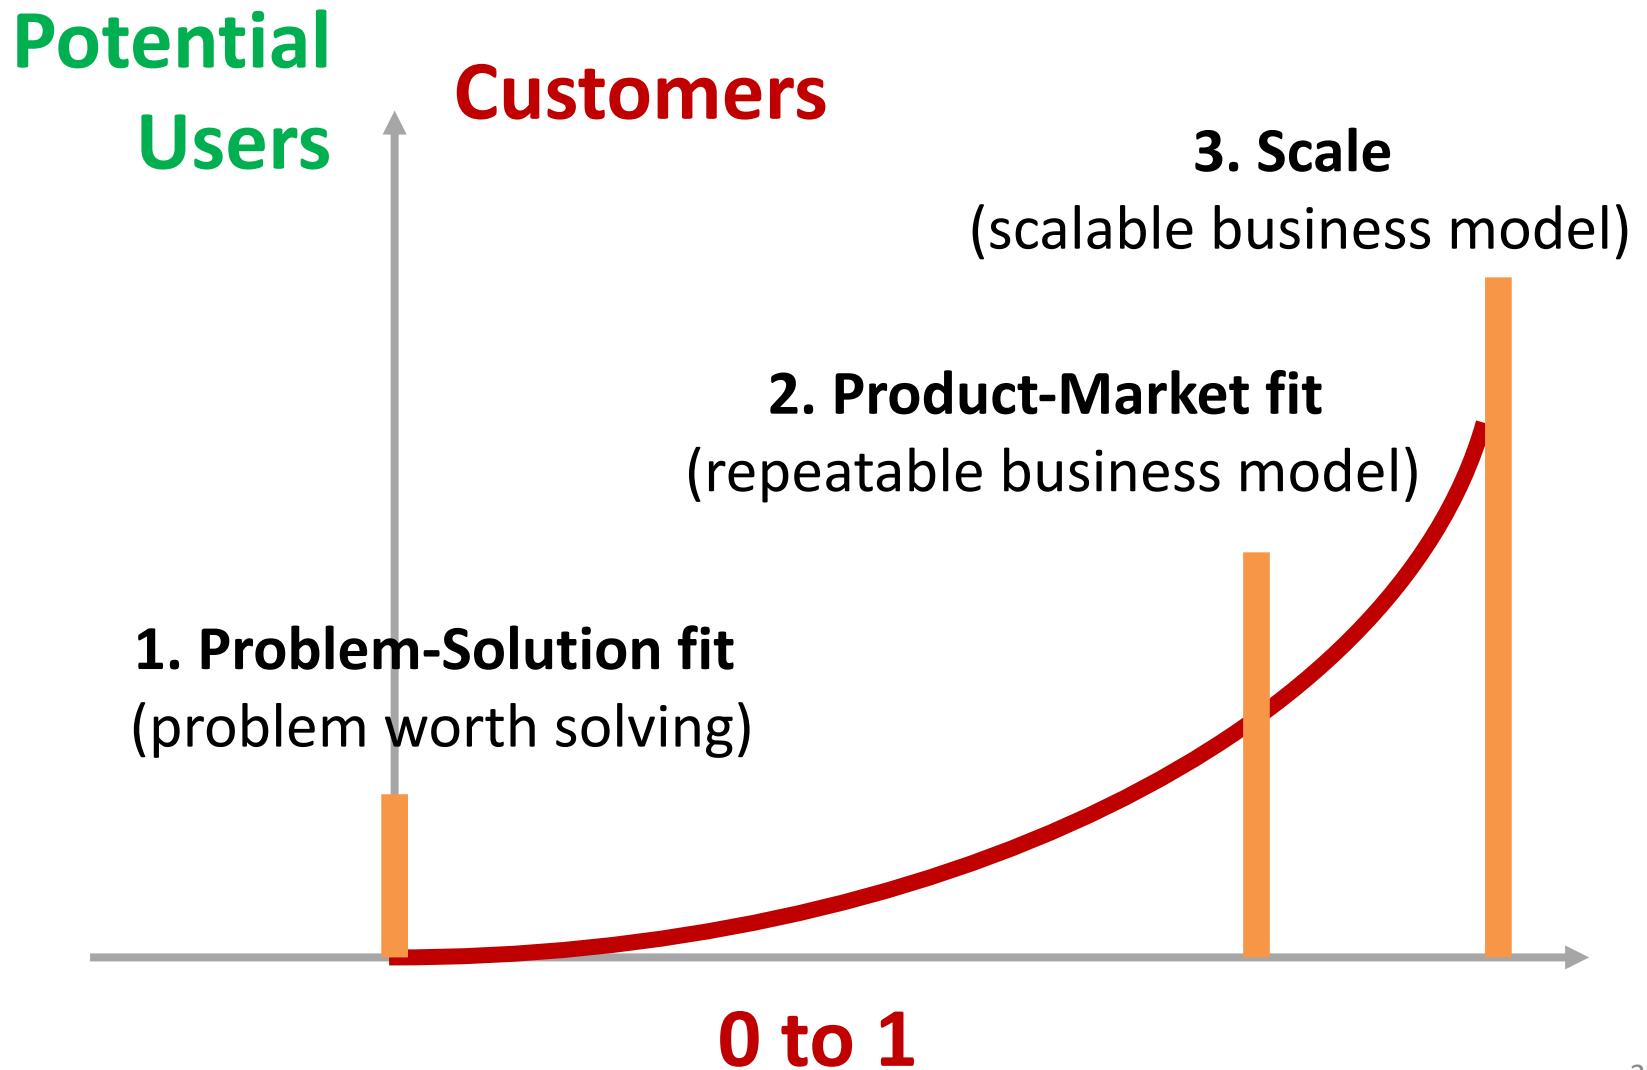

Why? Social pressure

How to improve?

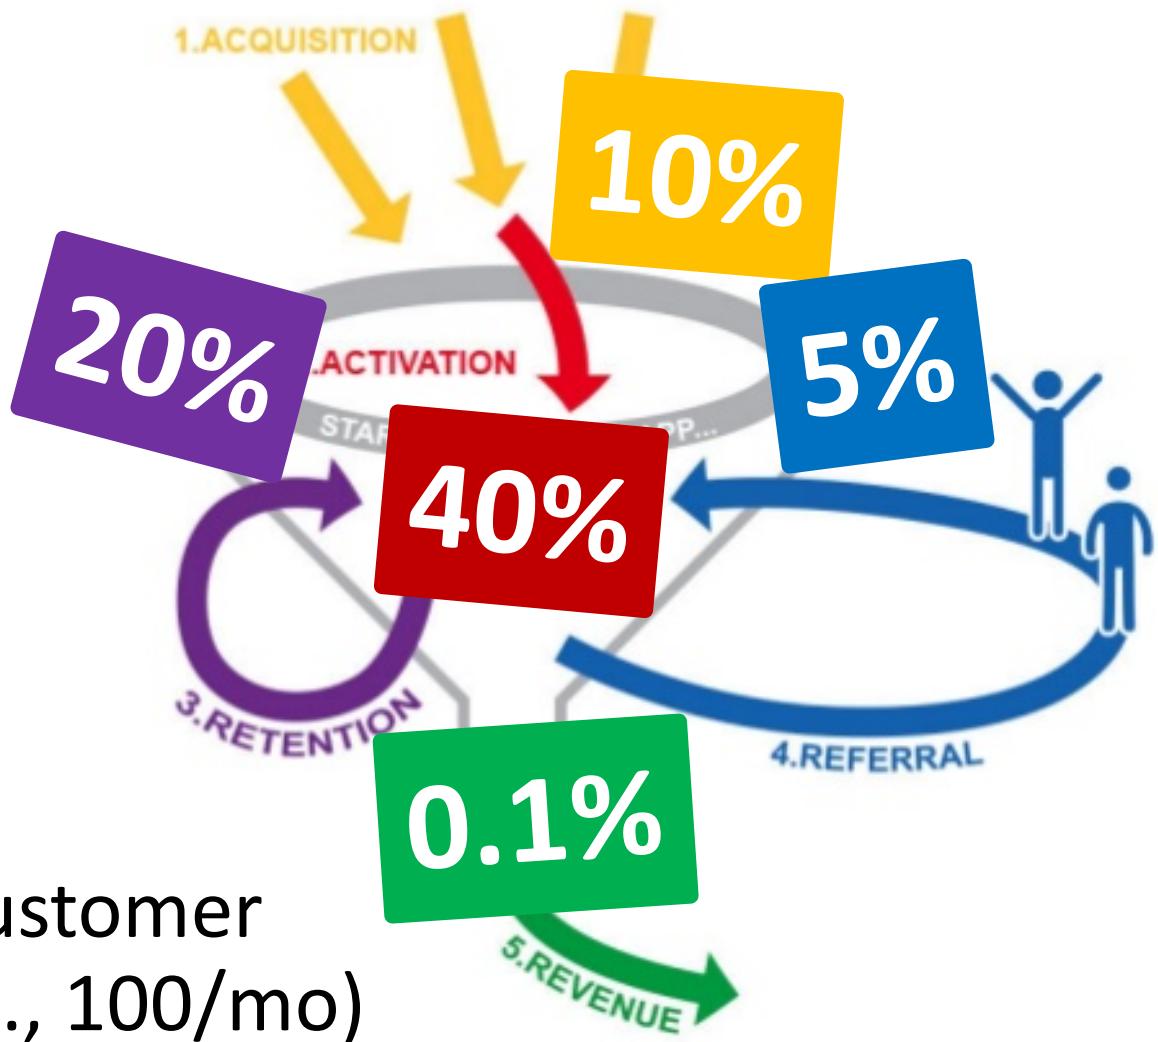

Outline

- Why?
- AARRR Funnel and Lean Startup
- The Missing Parts
 - 0-1 vs. 1-100
 - Customer Factory
- Goal Setting
- Your Business Plan

Build Product *after* PS Fit

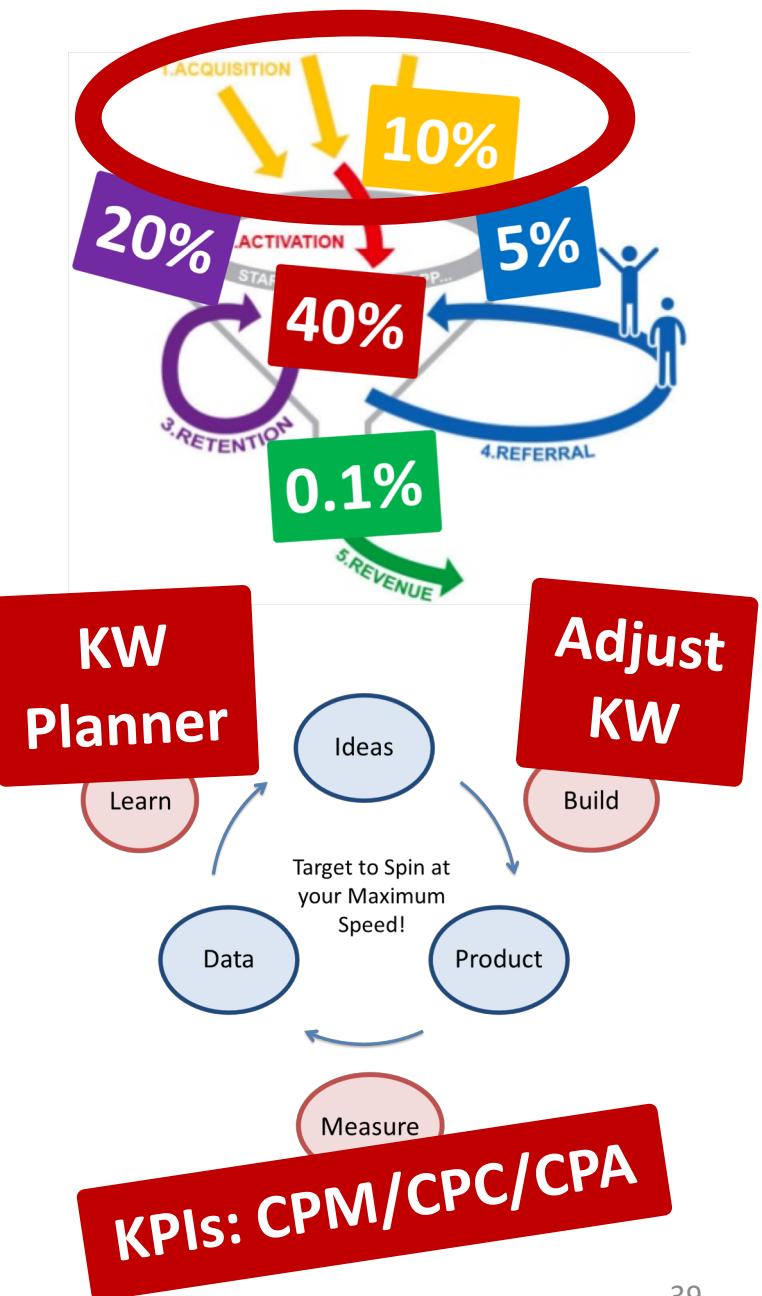

Product Launched. Where's PMF?

- PMF =
Satisfactory Customer
Gen. **Rate** (e.g., 100/mo)

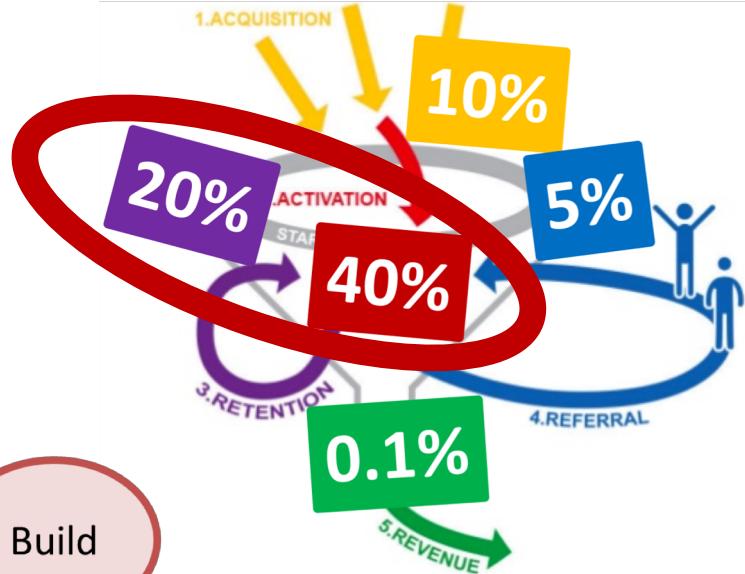

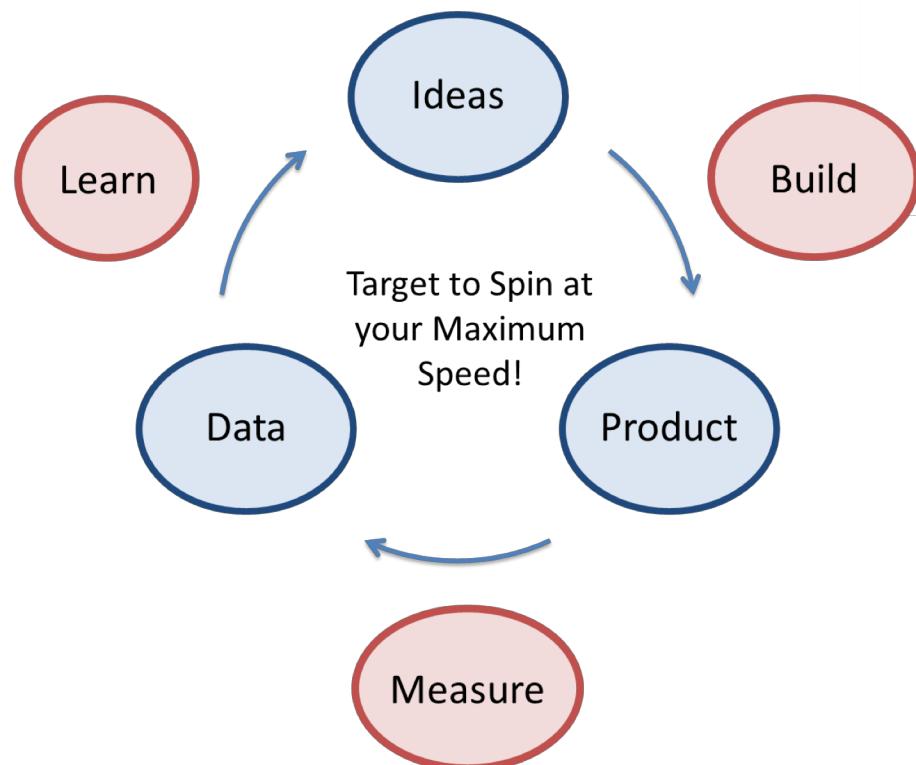

Battle 1: Acquire Enough Early Users

- Acquisition costs!
- Luckily, you don't need a large user base
 - Stealth mode
- How “strangers” discover your product?
 - E.g., SEO/ASO
- Focus on *lasting* channels

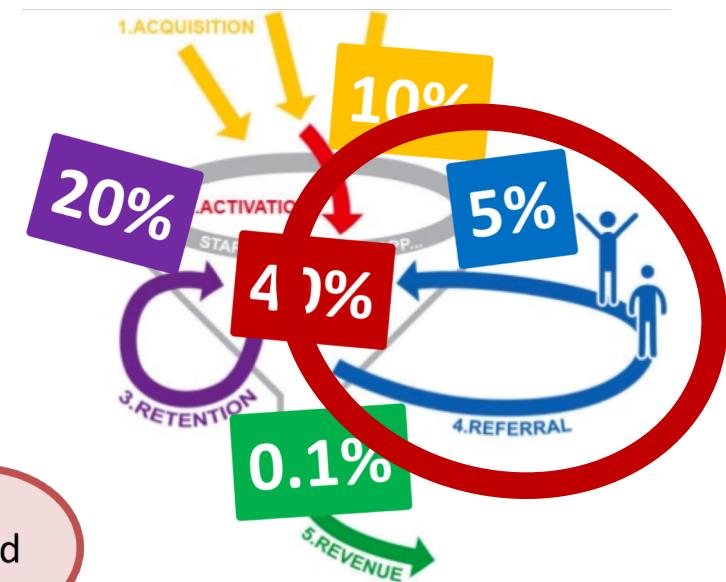

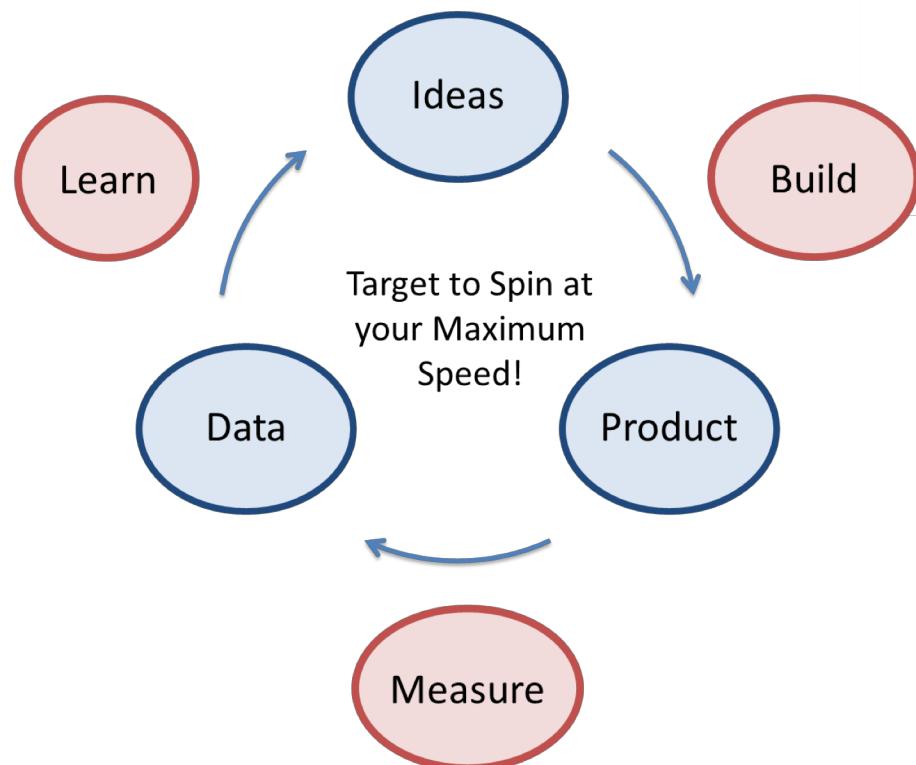

Battle 2: Make Users Happy & Returning

- Topics of 2nd lecture

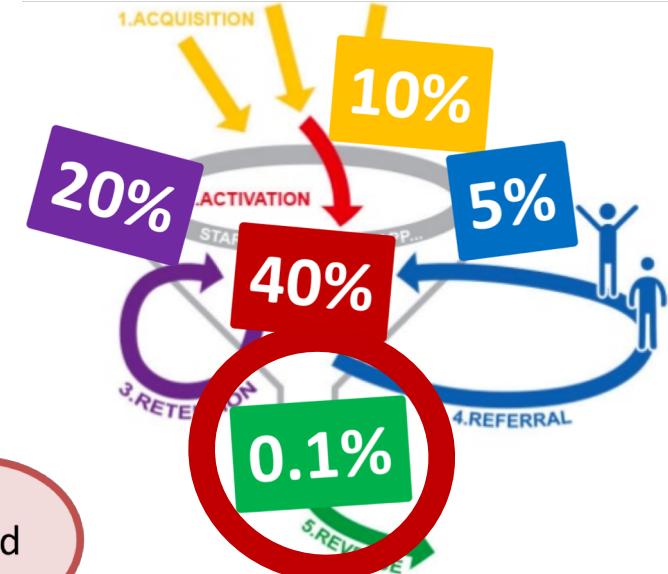

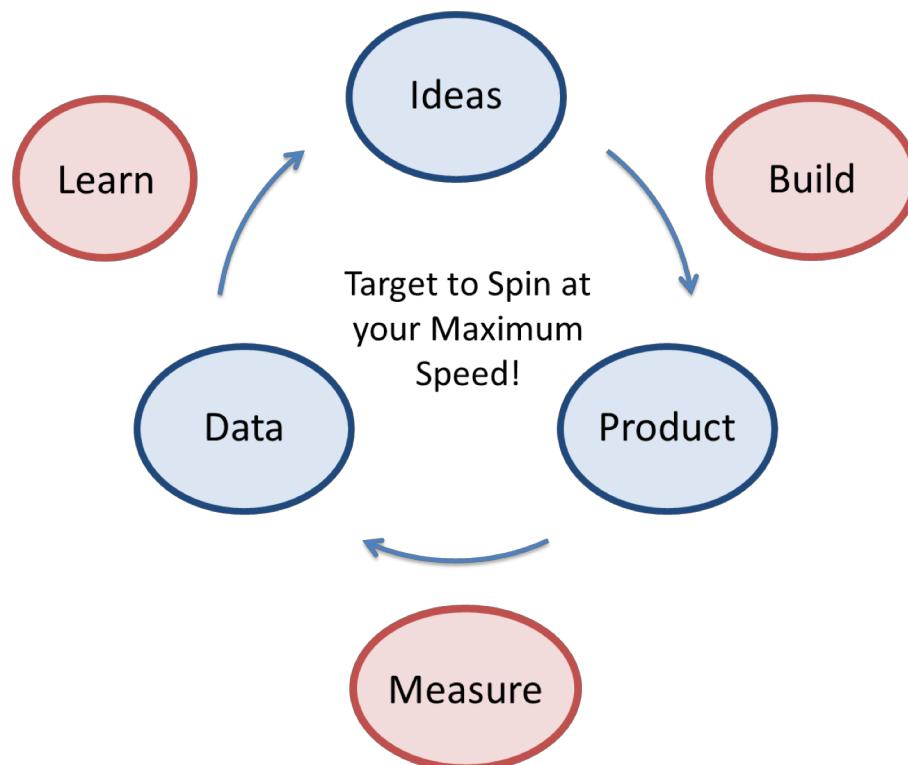

Battle 3: Turn Users to Your Salesmen

- Topics of 3rd lecture

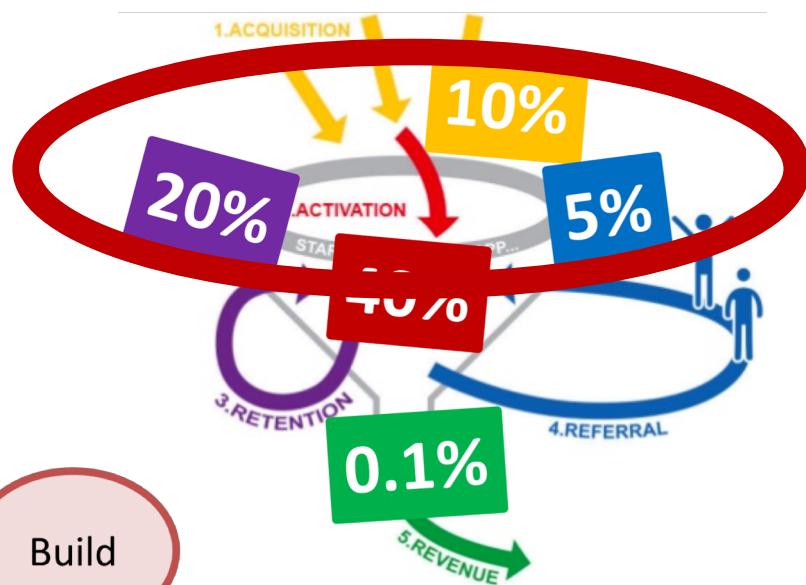

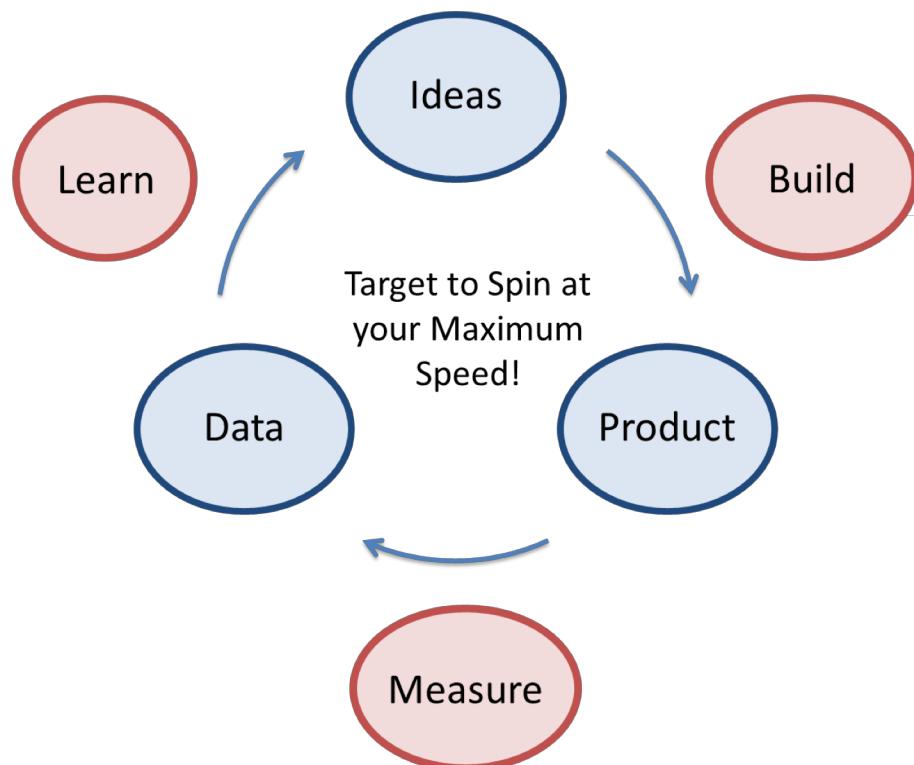

More: Repeatable Business Model

- Not in this class

Battle after PMF: Scale

- Not in this class

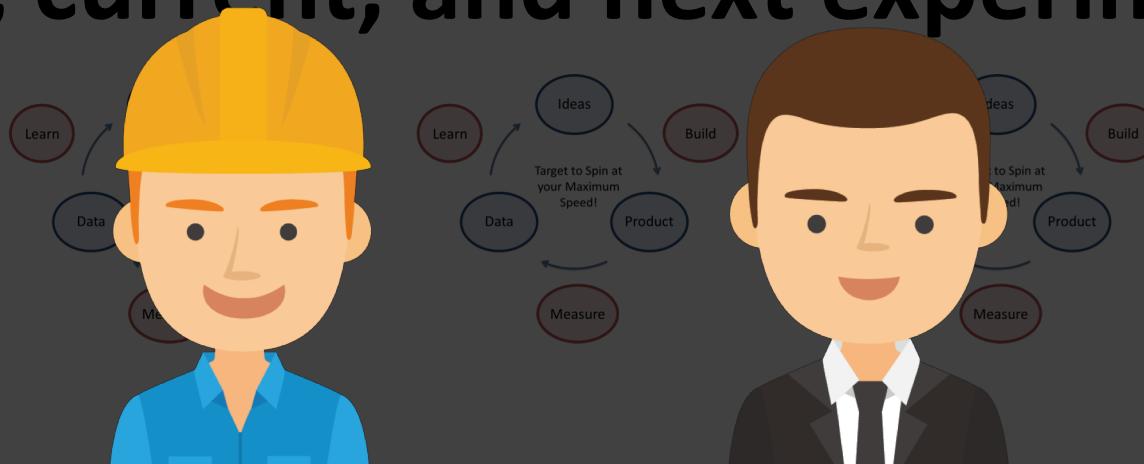

Team Collaboration: Lean Dashboard

Where are we? What KPI to improve?

Past, current, and next experiments

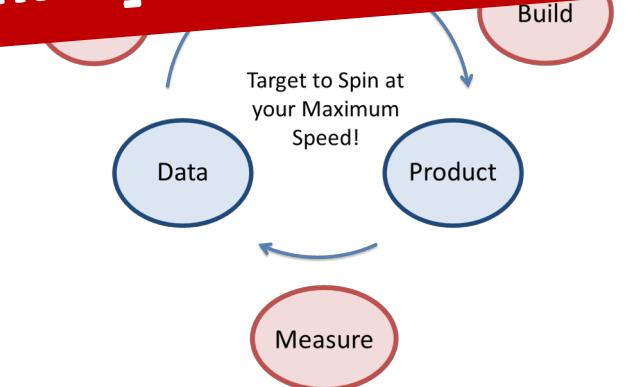

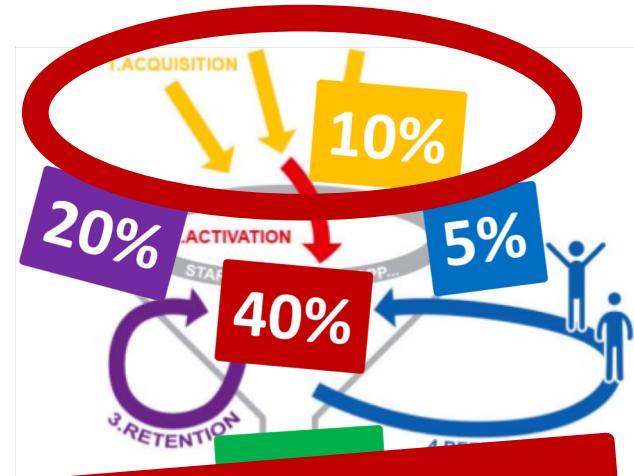

Pitfalls of Lean Execution

- Here're the results. Are we success or not?
- Did not take into account...

Evaluable Experiment:
[Repeatable Action] leads to [Predictions]
before [Deadline]

All members play a “game”

- Action not repeatable
- No deadline

- The Missing Parts
 - 0-1 vs. 1-100
 - Customer Factory
- Goal Setting
- Your Business Plan

Your ~~BP~~ *Idea* Presentation

- 3 minutes for each team
- 6 pages:
 1. Problem (5 whys? Poorly met?)
 2. Customer segments (Early adapters?)
 3. Solution (Value? 3 key steps to get the value?)
 4. Unique value proposition (Competitors? Why you?)
 5. Channels (Users reachable? Start from small?)
 6. Cost structure (How much you are welling to pay?)
